Subject: Fwd: Request for API Access to India Code for DLA Project
========== Forwarded message ==========

Aditi ji, sharing this for your information, please. We are also following up simultaneously to ensure that the process is expedited at the earliest. Hopefully, it will be resolved by this week.

In addition, for bulk data relating to petitions and copies of judgments, we could coordinate with our Branch Secretariats (Kolkata, Mumbai, Chennai, Bangalore), Delhi Litigation centre as an interim arrangement until a proper channel for data access is established. This would allow us to get started with at least some data in the meantime.

Please let me know how you would like to proceed.

Regards,
Haimanti Bhattacharya

Subject: Request for API Access to India Code for DLA Project
========== Forwarded message ==========

Good Afternoon Sir,

The Department of Legal Affairs is currently exploring the feasibility of an AI-based project in consultation with NeGD, for which access to the Acts, Rules and Regulations available on India Code would be required. In this connection, NeGD has sought access to the India Code API to examine the technical requirements and feasibility of the proposed project.

As I understand from my earlier discussions, NIC is already in the process of making the India Code API available through API Setu or NAPIX.

Since this exercise is time-sensitive, may I kindly request you to facilitate access to the India Code API for the NeGD team at the earliest. I would be grateful if this request could be given priority, as it would help us take the proposal forward within the planned timelines.

Regards,

Haimanti Bhattacharya
Director (Cyber Laws)
Department of Legal Affairs
